## What Would Your Perfect Pool Be?

We understand that your pool is a personal reflection of you. When we started our service company several years ago, we asked hundreds of pool owners what they thought about their pools—what they liked, disliked, and what they would have done differently.

Now as a custom pool builder, we have taken the best ideas and combined them with the highest quality state-of-the-art equipment, surfaces, and construction techniques to create an easy-to-care-for backyard retreat—at a fair price.

**Your Personal  
Space...**

**From Our Personal  
Service.**

Our start as a pool cleaning and maintenance company taught us what makes a pool easy and economical to care for. Using the latest and most efficient equipment available, we can make sure that your time is spent in the pool—instead of working on it.

We can help you create the perfect pool—to fit your family, your yard, your tastes, and your budget.

We also have remodeling and cleaning services available. Our service department is a warranty center for all the equipment that we install on your pool. We also provide sales and service for all major pool equipment manufacturers as well as tile, plaster, coping, and deck repairs.

A pool is an important investment; we design each of our pools to perform and to last. All of our pools are built with the highest steel schedule available as well as the best pumps, filters, heaters, and controls on the market.

*We build pools with a personal touch at a fair price and stand behind them.*

If we can help you to design a little piece of paradise in your back yard, please give us a call; we would like to meet with you and see what we can do for you.

Thank you,  
Brad Shields, President
